Project Title: All About Fast Fashion

I would like to build a page that gives an overview regarding the development of fast fashion. My plan is to add a lot of photos to illustrate what I am talking. If possible, I am also interested in presenting this content via horizontally scrolling cards. I think there is more than enough content to build this site out.

1. **Home Page/Introduction** — What is fast fashion. I will be defining the term, as well as any other important words related to this discussion.

2. **Origins** — Where did fast fashion originate from and when. Additionally, what are some reasons for it developing in the first place.

3. **Impact** — This section will cover some of the environmental impact as well as the human rights violations that have been due to fast fashion.

4. **Response (slow fashion movement)** — How some people have responded against fast fashion.

5. **Sources** — The articles and websites used to fill out this Wikipedia page:

   https://en.wikipedia.org/wiki/Fast_fashion
